TOUGHER THAN YOU CAN IMAGINE

**Being number one for this long
has taught us a thing or two
about the need to be better.**

Why substitute performance for purpose? When you drive a Hilux you need to know that you can get the job done, whether that's on the paddock, on the project or at the picnic.

We know how exacting your demands are and that's why we've created a range that is tougher than ever before. Of course, being tough is just the beginning. That much you already know. What you may not have expected was the versatility to match.

DRIVING PERFORMANCE

.....

You can expect to find under the bonnet our fuel efficient 3.0 litre, 4 cylinder, in-line Turbo Diesel engine, delivering 126 kW of Hilux power and 343Nm of torque. To handle that, you can choose between our five-speed manual transmission (offering you all the control) in our Single and Extra Cab models, or indulge in our 5-speed Electronically Controlled automatic Transmission (ECT) - an exciting option for Double Cab fans.

There's always the chance you'll be covering some fairly tough terrain, so that's why we've also worked hard to create a more dynamic, yet still fully independent, front suspension system, to complement our proven rear leaf spring rigid axle design. Both are optimised for nimble handling and car like comfort. Because we don't know where you're going, we've taken the liberty of getting you there with precise steering (3.72 turns lock to lock for 4WD models to be exact, with a minimum turning circle of 12.4 metres, 12.8 metres for Double Cabs) and less effort, thanks to our engine speed-sensitive, power-assisted, rack and pinion steering.

Now that's performance.

 **TOYOTA** | *Believe*

4WD SR5 DOUBLE CAB IN VELOCITY RED (ACCESSORIES ALSO SHOWN)

ON AND OFF THE ROAD

To maximise Hilux's performance, our team didn't just research the latest in automotive trends, they studied the latest in New Zealand driver trends. And what they discovered formed the foundation for all the enhancements you see today.

Our proven Anti-lock Braking system (ABS) fills you with confidence to control your ability to stop when you need to, and safely. And we've gone further. We know that you put Hilux through its paces like no other drivers on the planet, but we never know what's around the next corner. That's why Double Cab models also feature intuitive Vehicle Stability Control (VSC) ensuring safe cornering no matter what the conditions. Hilux Double Cab VSC models come complete with Electronic Brake force Distribution (EBD) and Brake Assist (BA) for even more control.

Add to all of this an aerodynamics-enhancing engine undercover for improved steering feel and stability, and a model range to suit any requirement and you have the technology to match the toughness.

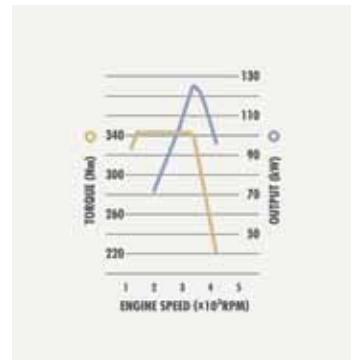

4WD SINGLE CAB CHASSIS IN TIDAL BLUE (ACCESSORY TRAY ALSO SHOWN)

POWER AND PERFORMANCE

The 1KD-FTV diesel engine has impressive off-the-line performance as it delivers its 343Nm of torque from only 1400rpm and does this all while meeting the Euro 4 emission standards.

This 3 litre variable vane turbo charged diesel D-4D engine features a common rail system that maximises low-end torque.

While you revel in the power and performance of your new Hilux you can breathe easy too, knowing our engine has been optimised to reduce unwanted emissions.

EXTERIOR STYLING

Our engineering team has been where you need to be; they've seen for themselves the conditions you operate in; they understand New Zealand's landscape, and New Zealand's drivers. They also know you share something with drivers all over the world: a belief that style and substance need not be mutually exclusive.

Take a look at any of our Hilux models and you won't notice something, you'll notice everything. Our design team had a simple task: make improvements everywhere. And so, they did. Little things matter to you as much as they matter to us, so take note of the powerful yet elegant grille styling, and the sweeping new over-fenders (on selected models), and the low profile central hood scoop, and the multi-reflector halogen headlights and there are even fog lights for the SR5 range. Take note of the full body-colour bumper on our Extra Cab and Double Cab range, not to mention the alloy side steps and front towing hooks. Obsessive? Maybe. But you wouldn't expect anything less.

INTERIOR CONVENIENCE

Sure, you might need uncompromising strength today, but tomorrow you'll want unrivalled detailing. Whoever said you can't have both doesn't work for us.

We believe driving should still be a pleasure, no matter how challenging the task at hand, and that's why we've gone to work inside the cab too.

Sit inside. Feel that sense of space from your fully adjustable slide and recline seat. Observe how things just seamlessly blend together; the high-grade seat and door trim fabrics and the matching carpet in our SR5 models, or hardwearing vinyl flooring in others. Look at that console with its flowing lines and insistence on modern functionality, including USB connection, Bluetooth hands-free phone operation and Bluetooth audio streaming, voice control and security system. Reach out and discover the comfort of our reworked 4-spoke steering wheel and the convenience of our easy to reach storage - above, below, and in front. And, when you've got used to all of that, why not control your environment, with dial-type air-conditioning controls (digital in the SR5 range), power windows (one-touch up and down for drivers side only) and electric rear-view mirrors. Convenience has never looked so good.

SAFE AND SECURE

Since 1976, when Hilux first became a part of who we are, we have never been satisfied with being good enough. Being good enough is for those who don't have what it takes to be great. What it takes to be great is an insatiable desire to exceed expectations, and nowhere are those expectations more important to exceed than in safety.

Across the Hilux range our Anti-lock Braking System (ABS) comes standard. That's because we understand in your line of work, when you need to stop in a hurry you want all the control you can get. For extra piece of mind there are driver and passenger front and side airbags, and front curtain shield airbags, while our Double Cab and Extra Cab models come complete with rear curtain shield airbags for extra peace of mind.
